

# THE NEW PROFIADAPTER SF

With the Profiadapter „SF“, it is now possible to clamp vehicle doors with the door panel where both hinge pins are directed downwards. This is increasingly the case with newer models of the VW group such as Skoda, Seat, Audi, Porsche and also with newer models of Mercedes. The clamping device, which can be operated without tools, is extremely flexible, safe and easy to use.

**NEW +  
OPTIMIZED**

**i** The Profiadapter „SF“ should be used as an addition to the conventional Profiadapter sets.
